

# SwiftTec Club Membership System

PRODUCT SHEET

The SwiftTec Club Membership System is a comprehensive, easy to use membership software solution, designed to meet the requirements of any club that needs to maintain a membership database and track member activity.

It is easy to setup and operate and has a comprehensive set of features which can be used to meet the needs of clubs of all sizes, from small clubs using a single PC, through to larger clubs with several entrances, networked PCs and up to 10,000 members.

## Business Benefits at a Glance

The SwiftTec Club Membership System is a proven solution in many types of clubs and it has enabled them to benefit from:

- Improved operational efficiencies
- Increased member retention and acquisition
- Reduced ongoing costs

## Key Features and Benefits

### Easy to Set-Up and Use

The SwiftTec Club Membership System has its own easy to use administration module that allows all of the major functionality of the membership system to be configured easily, to define member categories and enable the relevant features.

With its intuitive easy-to-use, password protected interface, users can learn to navigate the system straight away. The system works with generated or pre-assigned membership IDs and cards.

### Customisable Member Database

The member database accommodates detailed profiles of members, from full contact and emergency contact details through to specific membership types and other user definable attributes. Additional free form information can be added relating to the member and a photo can be attached to each member's profile.

The main tasks of maintaining the membership database such as adding, editing and deleting records are easy to follow. Individual members can be grouped together with shared common information if required, for example to support family or corporate memberships. ►

PRODUCT SHEET

## Comprehensive Features List as Standard

The optional features and modules are supplied with the SwiftTec Club Membership System at no extra cost and can be enabled or disabled to match the operating mode of the club.

### Additional features include:

- A **Card Designer Module** - to create customisable membership cards with photo and barcodes.
- A **Visit Logger Module** - either in conjunction with a barcode scanner or simply by typing in a member's ID, it provides a simple mechanism to log members in and out of the club. This allows for the tracking of members that are present on site at any given moment.
- A **Front Gate Module** - a comprehensive designed solution to manage activities that would be needed at a club entry point or reception area, such as the handling of financial transactions with reporting, passes, operators, loyalty points' collection /redemption and membership renewals.

### Detailed Reporting

The system provides a comprehensive set of reports on membership, visits and other statistics.

### Download an Evaluation Copy and Purchase

The SwiftTec Club Membership System is licensed using a per-computer licence and discounts are available for multiple licence purchases.

You can download a copy of the latest version of the Club Membership system from our website at [www.swifttec.com/downloads](http://www.swifttec.com/downloads).

To run the program, email [sales@swifttec.com](mailto:sales@swifttec.com) to obtain a trial licence key for the SwiftTec Club Membership System.

### Contact SwiftTec

At SwiftTec, we recognise that software does not always meet 100% of the needs of the customer and we can scope the development of a customised version of our software for a specific customer requirement.

If you would like to discuss your specific requirements or would like to find out more, please contact us at [sales@swifttec.com](mailto:sales@swifttec.com).

Fully compatible with Windows XP, Windows Vista and Windows 7
